

## IS-100A Automatic Induction Sealer

### Descriptions

- The induction sealing machine is a perfect equipment to seal all type of products (except metal bottle) to aim of wet proof, leakage-proof, mildew proof and extending the shelf-life of the products with output up to 200 bottles per minute.
- The automatic electro-magnetic induction aluminum foil sealing machine utilizes the principle of electro-magnetic induction to obtain hermetic sealing by making the surface of aluminum foil instantaneously heat to adhere tightly on mouth of bottle.

### Features

- Electro-magnetic induction mechanism.
- Easy to install and to use with little or no human intervention.
- No foil detection, bottle will be ejected.
- FREE conveyor is included.
- 100% sealing quality to increase the shelve life of the products and for safety purposes.

### Specifications

- Power supply: 220V 1 phase or 110v 1phase.
- Sealing speed: 80 - 200 bottles / min.
- Bottle height: 30-260 mm.
- Sealing diameter: 16 - 80 mm.
- Sealer dimension (L x W x H): 600×450×1310 mm.
- Conveyor dimension (L x W x H): 1800×450×1350 mm.
- Sealer weight: 90 Kg.
- Conveyor weight: 80Kg.
